Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, a, "the bottom" lack(s) proper antecedent basis in the claim(s).

In claim 1, a, "the bottom" is indefinite as to what this refers to, i.e. the bottom of what?

In claim 1, b, "the residue" lack(s) proper antecedent basis in the claim(s).

In claim 4, "the bottom products" lack(s) proper antecedent basis in the claim(s).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Smith

'241. See cols. 5-8 and the examples.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1754

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith '241 in view of the admitted prior art on instant pg. 3, lines 4-7.

Smith teaches the instantly claimed process wherein bottoms are evaporated at 50-150°C and then treated with calcium hydroxide or calcium oxide (see col. 5-8). The instant admitted prior art states that commercial arsenic containing hydrogen fluoride has water, sulfuric acid and sulfur dioxide contents which overlap those instantly claimed and thus would have been obvious.

The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness, *In re Malagari*, 182 USPQ 549.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
